

Mid Semester Test-1
Semester I, September 2024

Course: BCA

Subject: Problem Solving using C

Subject Code: BCA-105

Time: 1.5 Hour

Max. Marks: 20

Instructions: - i) Attempt **THREE** questions in all.

ii) **Part A is compulsory.** Attempt any **FIVE** parts from it.

iii) Attempt **TWO** questions from Part B by selecting one question from each section.

PART A

Q1. (i) What do you mean by data and information?

(ii) What is the difference between constant and variable?

(iii) What is the use of modulus operator?

• (iv) What do you mean by program?

(v) List primary data types of C language.

• (vi) Why compiler is used?

• (vii) Differentiate between hardware and software.

(5 x 2 = 10)

PART B

Section I

• **Q2.** What is an algorithm? What are its characteristics? Give example.

Q3. What do you mean by programming language? Differentiate between high level, machine level and assembly level language.

Section II

Q4. Explain the structure of C program using example? Describe the steps used in execution of C program.

• **Q5.** Write a program to find sum and average of five numbers.
